

To Whom it may Concern.

I own a satellite radio and subscribe to this service. I actually own two. I've recently started using the Instant Traffic and Weather features on satellite radio as it only recently became available. I find the service very useful and I have benefited from the information they have provided on several occasions. Therefore, I respectfully urge the FCC to reject the NAB's petition 04-160. If it ain't broke, don't fix it. Please let the free market operate freely. This is America for crying out loud, not China!

Thanks,

Steve Tauber
